

```
1 int[] a = {10, 20, 30};  
2 System.out.println(a[1]); // 20  
3  
4 double[] dades = new double[1000];  
5 dades[0] = 5.5;
```

```
1 int[] numeros = new int[3];
2 String[] nombres = {"Ana", "Luis", "María"}; // Inicialització directa
```

- ```
• nombres[0] nombres[1]
•
•
• array.length
```

```
1 numeros[0] = 10;
2 System.out.println(numeros[0]);
```

# String Array in Java

docs/assets/imatges/  
assets/imatges/...

for

```
1 for (int i = 0; i < numeros.length; i++) {
2 System.out.println(numeros[i]);
3 }
```

for-each

```
1 for (int n : numeros) {
2 System.out.println(n);
3 }
```
